

# Scott Mead

Associate AIA / Associate

Scott's work reflects his passion for the physical, social, and political intersections of people and places. These intersections and conflicts provide opportunities to improve the way people interface with the built environment. To successfully build socially and environmentally sustainable places, Scott values a collaborative design process that acknowledges the perspective of the entire project team and community. His experience has been a collection of various scales, ranging from tech office workplaces and cafes to large master planning projects.
